

What type of excess can I list?

Easy Excess has distribution partners and buyers in four main areas. Business and Industrial, Construction, Telecommunications and Computers and Networking. Although any company is welcome to list their excess items on Easy-xs.com, we have found that the companies experiencing the greatest return have been those listing wholesale items in the above categories. Because we aggressively market items listed on our site, we have a better chance of properly targeting your excess items to new buyers if we can work within our specialized industries.
